

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

lication of the description above cited. The figure in the plate accompanying this paper, is about two-thirds of the size of life, and represents the adult male from the mountain region on the Rio Truando, a tributary of the Rio Atrato, New Grenada.

6. *MONASA AXILLARIS*, Lafresnaye.

*Monasa axillaris*, Lafres., Rev. et Mag. Zool. 1850, p. 216.

*Monasa flavirostris*, Strickland, Jard. Contr. Orn., 1850, p. 47.

Jard. Contr. 1850, pl. 48.

I mention this species only for the purpose of again stating, that its name is that of the Baron Lafresnaye as above given. The type specimen, now in the Academy Museum, was described by him while in possession of Messrs. Verreaux, of Paris, and the same specimen was described by Strickland, while afterwards it was in England *en route* to Philadelphia.

7. *CAPITO VERSICOLOR*, (Müller.)

*Bucco versicolor*, Müll., Syst. Nat. Supp. p. 88 (1776.)

*Bucco pictus*, Bodd., Tab. Pl. Enl. p. 20 (1783.)

*Bucco elegans*, Gm., Syst. Nat. i. p. 406 (1788.)

*Bucco Maynanensis*, Briss., Orn. iv. p. 102.

Buff. Pl. Enl. 330.

Of this species which seems to be little known to naturalists, one specimen, evidently in mature plumage, is in the Academy Museum, and was received some years since from the Hon. John Randolph Clay, in a collection made by him while Minister of the United States to Peru. The skin was one of several which had the appearance of having been made by a non-expert person, and is stated to have come from the mountainous region of the interior of that country. This species is figured by Buffon, as above cited, with sufficient accuracy for recognition.

The Annual Reports of the Recording Secretary, Librarian, and Curators were read, as follows:

## REPORT OF THE RECORDING SECRETARY,

For 1864.

During the year ending 30th November, 1864, there have been elected thirteen members and nine correspondents.

The following members have died: Richard Randolph, Wm. D. Parrish, Samuel Ashmead, William J. Taylor, Thomas Dunlap, Wm. Pepper, M. D., John B. Myers.

The death of the following correspondents has been announced: Joseph Henderson, M. D., Francis Boote, Prof. D. J. Eschricht, Jaques A. Gay.

Two members have resigned.

The number of papers contributed and ordered to be published, during the same time, has been fifty-one, as follows:

Theodore Gill, twelve; Isaac Lea, LL.D., eleven; E. D. Cope, four; Elliott Coues, three; H. C. Wood, Jr., three; John Cassin, two; George W. Tryon, two; Jacob Ennis, two; A. Agassiz, S. F. Baird, Wm. M. Canby, T. A. Conrad, J. G. Cooper, M. D., Asa Gray, D. G. Elliott, C. A. Helmuth, Geo. N. Lawrence, Wm. Stimpson, Alex. Winchell, F. W. Lewis, M. D., each one. All of which is respectfully submitted.

B. HOWARD RAND, M. D.,

Recording Secretary.
